

ICELAND

Population: 121,618

Area: 39,709

A News Item in the JOURNAL (1939) cites a report from "Heilbrigðisskýrslur" (Public Health in Iceland) that cases continue to be discovered. They are rapidly diminishing, however, the known cases having fallen in ten years from 50 to 26. Most of these patients are accommodated in the leprosarium at Laugarnes.

NEWS ITEM.

1939. Diminution in Iceland. *Internat. J. Leprosy*, 7, 425.
