

ERRATA: Vol. 49, No. 4, "Immunogenetics of Susceptibility to Leprosy, Tuberculosis, and Leishmaniasis. An Epidemiological Perspective" by Fine.

Page 439, left col., line 14, lepromin should be leprosin

Page 443, right col., line 42, near should be neat

Page 446, left col., line 16, usual should be unusual

Page 452, right col., line 35, any should be many

ERRATA: Vol. 50, No. 1, "An Immunoperoxidase Study of Immunological Factors in Skin Lesions Across the Spectrum of Leprosy" by Ridley, *et al.*, pp. 11-19, legends to Figs. 4, 5, 6, 7, 8 and 9 should read:

Fig. 4. IgG producing cells present in considerable numbers among the lymphocytes on the periphery of a TT granuloma ($\times 300$).

Fig. 5. Clusters of IgG producing cells in a BT granuloma ($\times 100$).

Fig. 6. C3 producing macrophages near a capillary in a LL granuloma ($\times 600$).

Fig. 7. C3d present as a faint deposit in macrophages around a papillary vessel in LL ($\times 500$).

Fig. 8. C1q in epithelioid cells (or cells of mononuclear origin) in a TT granuloma. Note the diffuse outlines due to export into the extracellular spaces ($\times 500$).

Fig. 9. Lysozyme present as granules in mononuclears, epithelioid, and giant cells in TT ($\times 300$).
